

Software Design Engineer

Job Description

You will work on new technologies enabling smooth interaction between distributed embedded resources. Making society to be more smart and competitive in digital systems by ensuring privacy of sensitive information in safety, business and privacy sensitive applications. You will be part of our research team developing hard and software solutions for the mentioned applications with our international R&D partners and customers.

Your Responsibilities

- Design of software concepts under consideration of safety and security aspects.
- Application development in languages like JAVA and C/C++ for various target platforms including embedded systems.
- Design of software test concepts.
- APP development for smart devices to demonstrate networked applications.
- Contribution to new R&D activities within our international research projects.

Your Tech-Profile

- Very good knowledge of the programming languages JAVA and C++ is mandatory; good knowledge of Linux or similar open operating systems like Android or iOS are a plus.
- You provide experience in software development suitable for embedded system design.
- Expertise in software test methods and their application to projects.
- Beneficial is also knowledge in fields like network technology or communication standards like e.g. NFC or Bluetooth (Low Energy).
- Experience with cloud services like AWS is a plus.

Your Personality-Profile

- Balanced mixture of team worker and independent and flexible work style.
- Project execution on your own responsibility.
- Your satisfaction comes from providing solutions on technical AND customer level.
- Advanced English skills are mandatory; German is a plus.

Min. Experience Level: You bring first experience from your university projects (Bachelor or Master Thesis), from private interest, from internships or short term professional engagements.

Education Level: University **bachelor or master degree** in telematics, computer science, electronics, informatics.

As a Company we offer

We offer an international environment where you can **be yourself** and your **opinion counts**.
